

JIRA Integration With CA Agile Central (RALLY)

The integration of JIRA with CA Agile Central (RALLY) helps enterprises closely couple the product management, development, and Quality Assurance (QA) teams in the ecosystem. With this kind of visibility, the coordination between the teams becomes easier and product delivery process becomes seamless.

Integration overview

In an Application Lifecycle Management (ALM) ecosystem, the choice of systems and the collaboration between the cross-functional teams play a great role in delivering quality solutions. While the choice of systems impacts the productivity of a team, the cross-functional collaboration enhances seamless communication between teams to take better decisions, faster decisions.

By integrating JIRA with CA Agile Central, enterprises can diminish the collaboration barriers between product management, development, and QA teams that otherwise lead to quality issues, delivery delays, and financial loss.

How JIRA - CA Agile Central integration is beneficial for an enterprise

- Trace the user story breakdown and associated test cases
- Get complete context of the customer requirement and receive real-time updates when there is a change in the plan
- Coordinate on the delivery timelines seamlessly with concurrent updates on changes
- Get full traceability into the Quality Assurance (QA) reports

With JIRA + CA Agile Central integration, enterprises can:

- Make better and faster decisions
- Accelerate speed of delivery
- Ensure complete traceability of a feature/requirement
- Get quality delivery in stipulated time
- Leverage the best of functionality and collaboration in the delivery ecosystem

How OpsHub Integration Manager integrates JIRA and CA Agile Central

OpsHub Integration Manager integrates JIRA and CA Agile Central bi-directionally. It ensures that all historical and current data is available to each user, in that user's preferred system, with full context, in real-time. All 'user stories' from CA Agile Central along with all details synchronize to JIRA giving the development team visibility into the plan. The product management team using CA Agile Central also has real-time visibility into the progress of the development work; and therefore, they can plan the iterations better.

Commonly synchronized entities between JIRA and CA Agile Central (RALLY)

The popularly synchronized entities between JIRA and CA Agile Central are shown on the left:

Benefits of integration for JIRA and CA Agile Central (RALLY) users

JIRA users	CA Agile Central (RALLY) users
Access to the user stories and associated updates from within JIRA	Traceability for user stories throughout the ALM tool chain
Complete context of the customer requirements and priorities	Visibility into the progress of development work & the QA cycle
No manual efforts needed to keep product management teams updated on the development status	No dependency on manual communication for making decisions

Features of OpsHub Integration Manager

Unidirectional as well as bi-directional synchronization

Full history and audit trail for integrated systems

Complete traceability of work items as well as non-work items

Robust failure management and recovery mechanism

Pre-requisites to run OpsHub Integration Manager

Supported Operating Systems

Windows

- Windows Server 2012 R2
- Windows Server 2012
- Windows Server 2008 R2 (64 bit)

Linux

- RHEL 5.2 + (64 bit)
- RHEL includes Cent OS and Fedora

Tested on the following versions:

- CentOS release 5.5 (Final)
- CentOS release 5.6 (Final)
- CentOS Linux release 7.1.1503 (Core)
- Fedora 20

Database Prerequisites

The underlying database should be installed to install and run OpsHub Integration Manager. The database user created for OpsHub Integration Manager should have schema level and read write privileges.

- MySQL Server
- MS SQL
- Oracle
- HSQLDB
