

Windchill RV&S Integration with Jama Software

If Windchill RV&S and Jama Software are integrated, then the backend team and product management team will always be in synchronization about the progress of delivery work and communicate with each other from their own systems without any additional manual work.

Integration overview

In an Application Lifecycle Management (ALM) environment, the choice of systems and the collaboration between the cross-functional teams play a great role in delivering quality solutions. While the choice of systems impacts the productivity of a team, the cross-functional collaboration helps the teams get complete context of the business requirements.

Best-of-breed systems such as Windchill RV&S and Jama bring rich functionalities to the ecosystem. By integrating Windchill RV&S with Jama, enterprises can diminish the collaboration barriers between product and development teams that otherwise lead to quality issues, delivery delays, and financial loss.

How OpsHub Integration Manager integrates Windchill RV&S and Jama Software

OpsHub Integration Manager integrates Windchill RV&S and Jama Software bidirectionally. It ensures that all historical and current data is available to each user, in that user's preferred system, with full context, in real-time. All 'requirements' from Jama Software automatically synchronize to Windchill RV&S and all the entities and details associated with the 'requirement' synchronize back to Windchill RV&S.

How Windchill RV&S + Jama Software integration is beneficial for an enterprise

- Trace the requirement breakdown completely - access the features, product backlogs, tasks associated with the requirement
- Track the estimated and actual development efforts
- Get complete context of the business requirement and receive real-time updates when there is a change in the plan
- Coordinate on the delivery timelines seamlessly with concurrent updates on changes
- Get full traceability into the Quality Assurance (QA) reports from both systems

Commonly synchronized entities between Windchill RV&S and Jama Software

Benefits of integration for Windchill RV&S and Jama Software users

Windchill RV&S users	Jama Software users
Access to the business requirements and associated updates from within Windchill RV&S	Traceability for business requirements throughout the ALM tool chain
Complete context of the customer requirements and priorities	Visibility into the progress of development work
No manual efforts needed to keep product management teams updated on the development	No dependency on manual communication for making business decisions

Features of OpsHub Integration Manager

Bi-directional sync with conflict resolution

Support for the largest number of entities

Database-class reliability and recovery

Support from 50+ systems and growing

History preservation and Process customization

Pre-requisites to run OpsHub Integration Manager

Supported Operating Systems

Windows

- Windows Server 2008 R2 and above (64 bit)

Linux

- RHEL 5.2 + (64 bit), RHEL includes Cent OS and Fedora

Database:

- MySQL Server, MS SQL, Oracle, HSQLDB

Supported System Versions

- 2009 to 12.x

- From 8.22 to 8.54.x
